

Senior AI Data Platform Engineer

About the job

In accordance with the applicable laws and regulations on personal data protection, including the Law on Personal Data Protection and its implementing regulations, Home Credit Vietnam Finance Company Limited (“Home Credit”) collects and processes candidates’ personal data for recruitment purposes and other related purposes in accordance with the Agreement, Notice and Acceptance for Personal Data Processing.

By submitting your application to Home Credit through LinkedIn , you acknowledge that you have read, understood and agreed to the contents of the Agreement, Notice and Acceptance for Personal Data Processing available at the following link: [AGREEMENT, NOTICE, ACCEPTANCE FOR PERSONAL DATA PROCESSING](#), and consent to Home Credit collecting and processing your personal data in accordance with applicable laws and regulations

KEY RESPONSIBILITIES

ML Data Platform Engineering & Administration

- Install, configure, and maintain ML data platforms on top of Kubernetes, Object Storage, Cassandra, Postgres and related technologies
- Monitor platform performance and optimize as needed for reliability and efficiency

Platform Configuration and Maintenance

- Implement and manage platform configurations, ensuring adherence to best practices and security standards
- Regularly update and patch systems to maintain security and stability

Collaborate with Cross-Functional Teams

- Work closely with ML and data engineers and other roles to align IT needs and strategies
- Provide expert guidance on ML data platform best practices and optimization

Troubleshoot and Resolve Technical Issues

- Identify, diagnose, and resolve data platform problems in a timely manner
- Escalate complex issues to upper-level support when necessary

Backup and Recovery Management

- Implement and maintain backup and recovery strategies for data platforms, ensuring data integrity and availability

Maintain and Update Documentation

- Create and maintain documentation related to data platform administration, configuration, and maintenance
- Share knowledge with team members and contribute to a culture of continuous learning

Enhance Data Security and Compliance

- Ensure data platforms adhere to security best practices and comply with relevant regulations
- Stay up-to-date on industry trends and evolving security standards

Drive Continuous Improvement

- Evaluate and implement new technologies and techniques to enhance data platform performance and administration
- Proactively identify areas for improvement, prepare plan for implementation and get support from management and development teams
- Always prefer automation and code-first approach over hard to reproduce manual tasks

REQUIREMENTS

- A degree in computer science, software engineering, information technology or related fields is preferred

- Production use experience with AI agents (like Langchain, Agno) and LLM stack (like KServe, vLLM, pgvector)
- At least 3 years of experience in data platform (Kafka, Spark, Airflow, Flink, KServe, MLFlow, Lakekeeper) and related infrastructure installation, administration, patching and automation (**Linux**, Ansible, Helm, Terraform, Kubernetes, Ceph)
- Continuous improvement mindset covering daily operations, stability, reliability and performance of ML data platforms
- Knowledge of key concepts like infrastructure-as-code, templates, playbooks, code versioning using GIT, CI/CD automation, high availability, disaster and recovery
- Proficient in **Linux** Shell, Python scripting, configuration using JSON, YAML files
- Ability to troubleshoot infrastructure, analyze logs and setup/update monitoring dashboards and metrics, describe and document root cause, attend retrospective meetings
- Understand IT systems documentation, data flow diagrams, integration diagrams and related terminology (UML)
- Understand major ML data platforms concepts – LLM, RAG, agent, quantization, fine-tuning, Data Lake, ACID, Distributed Query, Feature Store, Data Governance, Data Catalogue, Streaming, Batch , Parquet
- Proficient in using documentation (Markdown, Visio, Office 365) and communication tools (MS Teams)
- Proficient user of change management and support ticket/service desk tools (JIRA SD)

COMPENSATION & BENEFITS

- 13th Salary Fixed and KPI Bonus
- Premium Health Care program
- 24/7 Accidental Insurance
- 100% Social Insurance
- Meal + Phone Allowance
- Yearly Medical Checkup
- Professional and Transparent Working Environment
- Apply Latest Financial Technology in the World

Data Platforms Team Leader

JOB DESCRIPTION

Team Leadership and Management:

- Lead and mentor agile team of data platform and support engineers towards self-organization and empowerment
- Conduct performance reviews and provide professional development opportunities
- Present team achievements in internal and external events

Data Platform Administration & Support:

- Install, configure, maintain and monitor data platforms, including databases, filesystems, and other related technologies
- Regularly update and patch systems to maintain security and stability
- Identify, diagnose, and resolve data platform problems in a timely manner
- Implement and maintain backup and recovery strategies for data platforms, ensuring data integrity and availability
- Inform, support and educate users of historical and new platform features and related processes

Continuous Improvement, Technical Excellence and Accountability:

- Ensure proper data platform design and platform features enabling AI/ML model training/serving, data management, data quality tracking
- Oversee the technical design aligned with company strategy and policies
- Follow, select and apply the latest technologies and best practices in platform code, management, and AI/ML area

Delivery Tracking:

- Ensure projects are delivered on time, within scope, in alignment with product owner and users' expectations, including non-functional requirements (performance, security, stability, observability, continuity)
- Manage expectations, risks and resolve issues that arise during platform lifecycle

Collaboration with Product Owner(s) and Development Team(s):

- Work closely with the Product Owners and Development Teams depending on platform features and performance to align platform roadmaps with their goals
- Provide platform-level feasibility assessments for new features and enhancements
- Ensure clear communication and coordination between the team, Product Owner(s) and Development Team(s)

Automation, code quality and documentation:

- Implement and maintain quality standards for platform code
- Ensure regular testing and validation are implemented as vital part of automated CI/CD

Data Governance and Compliance:

- Ensure data platform features comply with relevant data privacy and security regulations and policies
- Manage data access and usage to protect personal data and other sensitive information

KEY REQUIREMENTS

- Previous experience with leading data or AI/ML platform engineering team
- Good knowledge of leading data platforms (Apache Airflow, Kafka, KServe, Iceberg, Lakekeeper, MLFlow, OpenMetadata, Oracle RDBMS, Spark, Trino), their operations and related infrastructure installation, administration, monitoring (Grafana, Prometheus), patching and automation ([Linux](#), GIT, Ansible, Helm, Terraform, Kubernetes, Ceph, KVM)
- Good level of understanding of typical data consumer use cases including applications, model training, model serving and various visualization tools (PowerBI, Grafana).
- Able to define team processes and track work item queues using JIRA software
- Able to provide well-structured, engaging feature and guideline documentation
- Experience tracking team member performance, identifying growth opportunities, ensuring smooth collaboration
- Bachelor's degree in computer science, engineering or related field
- Fluent English
- 5+ years in a software development environment preferably involving cross-team dependencies.

COMPENSATION & BENEFITS

- 13th Salary Fixed and KPI Bonus
- Premium Health Care
- 24/7 Accidental Insurance
- 100% Social Insurance
- Meal + Phone Allowance
- Yearly Medical Checkup
- 18 Annual Leaves
- Professional and Transparent Working Environment
- Apply Latest Financial Technology in the World
